

M. Awais

Full Stack Developer

+92 313 5820233 | awais10015@gmail.com | linkedin.com/in/awais10015 | github.com/awais10015 | Portfolio: awaiscodes.vercel.app

PROFILE

Full Stack Developer experienced in the MERN stack, NestJS, Laravel, React.js, and Next.js. Skilled in designing scalable architectures, developing responsive frontends, writing clean and maintainable code, building REST APIs, and delivering reliable, high-performance web applications.

TECHNICAL SKILLS AND STRENGTHS

Languages: JavaScript, TypeScript
Frontend: HTML5, CSS3, React.js, Next.js, Tailwind CSS, Redux Toolkit
Backend: Node.js, Express.js, NestJS, Laravel
Databases: MongoDB, MySQL, PostgreSQL
Libraries: GSAP, Framer Motion, Three.js, Lenis, TanStack Query
Cloud & Services: AWS, S3, Glacier, Stripe
Tools: Git, GitHub, GitLab, Jira, Slack, Notion, Postman, Vercel

EXPERIENCE

Rev9 Solutions

Associate Full Stack Developer

Jhelum, Pakistan

September 2025 – Present

- Designed a scalable event-driven backend using asynchronous job processing and distributed queues.
- Implemented dedicated job queues and workers for concurrent background task processing.
- Optimized API queries and processing, reducing response times to under **500ms**.
- Implemented client-side caching and server-state management using TanStack React Query.
- Reduced application load time by **80%**, from 25 seconds to 5 seconds.
- Developed responsive interfaces with 3D elements and animations using Three.js, GSAP, and Framer Motion.
- Integrated MySQL and MongoDB for relational and flexible JSON-based data management.
- Integrated Stripe for subscription billing and add-on payment processing.
- Implemented AWS S3 and Glacier for scalable storage and long-term data archival.

Rev9 Solutions

Web Developer Intern

Jhelum, Pakistan

June 2025 – September 2025

- Worked on full-stack development using React.js, Next.js, MongoDB, and REST APIs.
- Developed reusable components, responsive layouts, and interactive interfaces.
- Resolved UI issues and improved cross-device compatibility and usability.
- Strengthened full-stack development skills through professional and personal projects.

PROJECTS

ArchNova — Rev9 Solutions

Archaeology Data Management & Preservation Platform

- Engineered backend services for ArchNova, an archaeology SaaS for digitizing and preserving research data.
- Built Laravel services for artifact lifecycle, OCR processing, team tenancy, and quota management.
- Implemented background jobs for archiving, data processing, and Glacier storage transitions.
- Integrated AWS S3/Glacier, Stripe billing, and MongoDB-based record management.
- Developed export capabilities for CSV, PDF, and API-based data access.
- Technologies:** Laravel, PHP, MySQL, MongoDB, AWS S3, AWS Glacier, Stripe, Queues, React.js.

Vycare — Rev9 Solutions

Hospital Management Platform

- Developed features for a hospital management platform covering patients, appointments, and administrative workflows.
- Implemented appointment scheduling, calendar management, room booking, OT, and ward reservations.
- Integrated online payments using Stripe.
- Technologies:** React.js, Laravel, MySQL, Stripe.

Additional Projects

Other Personal Projects

- LineOne, MyStore, Healix, and Sundown Studio, iPhone Clone, DailyBook, and Real-Time Dashboard.

EDUCATION & QUALIFICATION

University of the Punjab

Bachelor of Science in Computer Science

GPA: 3.31 / 4.00 — 2021 – 2025
